RAHUL S VANNUR

Bengaluru, Karnataka | +91 7204983887 | rahulvannur@gmail.com | linkedin.com/in/rahul-vannur

SUMMARY

Aspiring Data Scientist and AI/ML Engineer with hands-on experience in Machine Learning, Deep Learning, Predictive Analytics, and Data Visualization. Proficient in Python, SQL, TensorFlow, Scikit-learn, NLP, OpenCV, CNN, Flask, and Streamlit, with a track record of building high-accuracy classification and regression models, AI-driven recommendation systems, and computer vision solutions achieving up to 95% model accuracy. Skilled in end-to-end ML pipeline development, from data cleaning and feature engineering to model deployment for real-world analytics applications.

SKILLS

Programming: Python, C, SQL

AI/ML & Data Science: Machine Learning, Deep Learning, CNN, Predictive Modeling, Classification, Regression, EDA, Feature Engineering, Model Evaluation, NLP, RAG, LLM, API Integration, Model Deployment

Libraries & Frameworks: Scikit-learn, Pandas, NumPy, Matplotlib, OpenCV, TensorFlow, Flask, Streamlit

Tools & Platforms: Power BI, MySQL

EXPERIENCE

AI & ML Intern — **9 Months**
VTU Visvesvaraya Research & Innovation Foundation (VRIF), Belagavi — *Remote*

- Developed and evaluated supervised Machine Learning models using Python and Scikit-learn, performing data cleaning, data transformation, and Exploratory Data Analysis (EDA) on structured datasets.
- Built end-to-end Machine Learning pipelines with feature engineering and model optimization, evaluating performance using accuracy, precision, recall, and F1-score metrics.

Data Science Intern — **6 Months**
ExcelR Solutions, Bengaluru — *Offline*

- Executed end-to-end Data Science workflows on structured datasets, performing data cleaning, feature engineering, and predictive model building using Python and Scikit-learn.
- Delivered analytical reports and data-driven insights to support business decision-making, contributing to improved analytical pipeline efficiency and workflow optimization.

PROJECTS

AI Ayurvedic Home Remedy Recommendation System — *Python, Flask, Machine Learning, LLM*

- Developed an AI-powered Ayurvedic recommendation system achieving 92% prediction accuracy in suggesting personalized home remedies based on user symptoms and disease classification using Machine Learning algorithms.
- Integrated an intelligent chatbot using the Flask framework to deliver real-time user interaction, automated health guidance, and dynamic remedy recommendations through a responsive web application.

Alzheimer's Disease Prediction — *Python, Machine Learning, Streamlit*

- Built a high-accuracy binary classification model using Gradient Boosting algorithms, achieving 93% accuracy in early-stage Alzheimer's disease prediction through healthcare data analytics and feature engineering.
- Performed data preprocessing, exploratory data analysis (EDA), visualization, and model evaluation while deploying the predictive system using Streamlit for interactive healthcare analysis.

Solar Power Generation Prediction — *Python, Machine Learning, Flask*

- Designed a predictive analytics system achieving 95% prediction accuracy in estimating solar power generation using environmental and weather-based parameters to improve energy efficiency and sustainable power management.
- Implemented regression-based Machine Learning models with advanced preprocessing and visualization techniques to analyze renewable energy generation patterns and optimize forecasting accuracy.

CERTIFICATIONS

- Python for Data Science
- SQL for Data Analytics
- Data Science – ExcelR Solutions, Bengaluru
- Internship Completion – VTU VRIF, Belagavi

EDUCATION

S G Balekundri Institute of Technology — **2022 – 2026**
B.E. in Computer Science and Engineering — CGPA: 8.1/10
